

User Centered Design 2020

Demo 1

3 X-task, individual work

Read and journal: Maguire, M. (2001). Methods to support human-centred design. International journal of human-computer studies, 55(4), 587-634.

The paper closely discusses ISO 13407 and human centered design practices. Create a learning diary/journal of about 2 pages with notes from the reading the paper. Compare the paper content with lecture notes so far.

In addition, discuss sections 3, 4, 5, 6, and 7 in terms of novelty, and importance and interest to your future career, e.g. using a table.

Grading 0-5.

Guidelines to Moodle submissions.

- Always submit as a pdf file, naming convention: surname_demo_\$number.pdf, replace \$number with the demo and task number
- Check the deadlines, submit before the demo. Late answers will be penalized.
- Always include a header with your name and student number.
- Any academic dishonesty leads to failed total grade.
