	Project A (Vaccination)	Project B (Navigation)
Ease of use	A control panel system for medical/health workers to see patients information.	Easy and simple design for Alzheimer patients.
Easy to reach	Everyone should reach this system without any difficulties.	Patients can forget things easily so, design must be easy to reach every time.
Show you care	Design should show care users and workers.	Patients should feel their need are provided and cared.
Risk 1 (Nature)	If everyone doesn't provide their personal information we can barely now about them.	If everyone doesn't provide their personal information we can barely now about them
Risk 2 (Lost opportunity)	It is hard to know user experience as a designer.	It is hard to know user experience as a designer.
Risk 3 (Suprise)	Designer can provide new habits to the users.	Designer can provide new habits to the users.
Risk 4 (Bias)	Users personal information always should keep private.	Users personal information always should keep private.
